

# QA Engineer (Contract) - Job Post

## Company: NTT SINGAPORE PTE. LTD.

Location: Singapore

Salary: \$6,000 - \$8,000 a month

Job Type: Contract

## Responsibilities:

The successful candidate for this role is expected to have a strong background in Regression and end-to-end Testing, with a deep understanding of JSON, API, and SQL. Familiarity with financial instruments and entities will be considered a plus.

This role requires an individual who is a fast learner, able to quickly comprehend business requirements and translate them into effective test cases using our in-house automated regression tools.

## Requirements:

- Possess a degree in Computer Science/Information Technology or related fields.
- Proven experience as a Software Test Engineer or similar role.
- Proficient in JSON, API, and SQL.
- Experience in regression and end-to-end testing.
- Strong problem solving skill and attention to detail.
- Excellent communication skill.
- Ability to learn quickly and work in a fast-paced environment.
- Experience in writing clear, concise, and comprehensive test plans and test cases.
- Willingness to support BAU operations as needed.
